

## Cantilever Lifts

Cantilever lift are the most popular lift used for almost any application. Very easy to use, with only one cable for low maintenance. Hewitt Cantilever lifts will go as low down in the water as most other brands vertical lifts. Standard Cantilever lift have capacities ranging from 1200# to 4800#. They also make Wide and Wide Long lift to Fit a Pontoon or a Deck boat.

## Hi Lift Vertical Lift

Vertical lift are used in high wave areas or where the water fluctuates greatly (1' to 2' in a short time span). Hewitt Hi Lift raise out of the water higher than the cantilevers. Lifting Capacities range from 1100# to 6600#. All Hewitt Lifts can be fitted with a optional Canopy.

## Personal Watercraft Lifts

Light weight and easy to use, Hewitt makes a PWC lift for all you needs. Capacities range from 700# to 1800# double lifts. There is even a 1100# Hi lift Vertical PWC for the big lake with big waves.

**Canopies are available for all of Hewitt Boat Lifts. Call or Email for Pricing. Delivery and Set up are available.**
